

MobileIron Product Portfolio

MobileIron provides the secure foundation for modern work. With the MobileIron platform, you can secure business data on the endpoints, clouds, and networks you own – and on the ones you don't. MobileIron products are available in the following packages, which are designed to match your mobile-cloud security requirements.

mobileiron
UEM

MobileIron Unified Endpoint Management

The platform for modern endpoint and app security. Our UEM platform is available in three bundles:

UEM Silver – For organizations with minimal mobile device management requirements

UEM Gold – For organizations that want to provide a secure workspace and modernize desktop management

UEM Platinum – For organizations that are transforming business workflows with mobile technologies and apps

mobileiron
**THREAT
DEFENSE**

MobileIron Threat Defense (MTD)

For organizations that want to protect against known and zero-day mobile threats

mobileiron
ACCESS

MobileIron Access

For organizations that want to provide adaptive access control for cloud services and in-house apps

MobileIron Unified Endpoint Management (UEM)	Silver	Gold	Platinum
Mobile device management and security			
Mobile device management (MDM) - Secure and manage endpoints running Apple iOS and Google Android operating systems. Available on-premises and as a cloud service.	✓	✓	✓
Easy onboarding - Leverage services such as Apple Device Enrollment Program (DEP), Android zero-touch, or Samsung KNOX mobile enrollment to provide users with the simplest user onboarding process.	✓	✓	✓
Mobile app distribution and configuration - Apps@Work, a customizable enterprise app storefront, combined with Apple Volume Purchase Program (VPP) facilitates the secure distribution of mobile apps. In addition, capabilities such as iOS managed apps and Android Enterprise allow for easy configuration of app-level settings and security policies.	✓	✓	✓
Secure email gateway - MobileIron Sentry, an in-line gateway that manages, encrypts, and secures traffic between the mobile endpoint and back-end enterprise systems.	✓	✓	✓
Desktop management and security			
Windows 10 management – Unified platform to manage modern Windows endpoints using a combination of Windows MDM APIs and traditional group policy objects.		✓	✓
Mac management – Manage macOS endpoints using state-of-the-art MDM APIs that allows for seamless enrollment, app distribution, and lifecycle management for Macs.		✓	✓
Secure productivity			
Secure email and personal information management (PIM) app – MobileIron Email+ is a cross-platform, secure PIM application for iOS and Android. Security controls include government-grade encryption, certificate-based authentication, S/MIME, application-level encryption, and passcode enforcement.		✓	✓
Secure web browsing - Web@Work enables secure web browsing by protecting both data in motion and data at rest on the endpoint. Custom bookmarks and secure tunneling ensure that users have quick and safe access to business information.		✓	✓
Secure content collaboration - Docs@Work allows users to access, create, edit, markup, and share content securely from repositories such as SharePoint, Box, Google Drive, and more.		✓	✓
Mobile app containerization – Deploy the AppConnect SDK or app wrapper to provide an additional layer of security for your in-house mobile apps or choose from our ecosystem of AppConnect integrated apps.		✓	✓
Derived Credentials – Support two-factor authentication using common access cards (CAC) and personal identity verification (PIV).		✓	✓
Secure connectivity			
Per-app VPN – MobileIron Tunnel is multi-OS app VPN solution that allows organizations to authorize specific mobile apps to access corporate resources behind the firewall without requiring any user interaction. Tunnel is available for iOS, Android, macOS and Windows 10.			✓
Scale IT operations			
IT systems integrations – ServiceConnect lets you share data from the MobileIron UEM platform with other IT systems, such as Splunk or ServiceNow, to streamline IT operations			✓
Server monitoring and management – MobileIron Monitor is a single dashboard view of system performance and historical trends for MobileIron Core and Sentry servers.			✓
Helpdesk tools – Help@Work is an app that lets IT remotely view and control a user's screen, with the user's permission, to help solve issues in an efficient manner.			✓

MobileIron Threat Defense (MTD)	MTD	MTD+
Mobile threat defense for iOS and Android		
Threat detection – Protect against known and zero-day threats and active attacks with sophisticated machine learning and behavior-based detection on the mobile endpoint.	✓	✓
Threat remediation – Limit time of exposure for possible exploitation and stop zero-day attacks with policy-based compliance actions. Provide alerts of risky behaviors and proactively shut down attacks on the endpoint with or without network connectivity.	✓	✓
Advanced app analytics - Continually evaluate mobile app risks to identify privacy and security threats.		✓

MobileIron Access	Access
Adaptive security and conditional access for any cloud service or in-house apps	
User verification – MobileIron Authenticator, a multi-factor authentication app that protects against credential theft.	✓
Passwordless sign-on – Seamless single sign-on (SSO) provides users with quick and secure access to services.	✓
Intuitive user experience – Leverage customizable access and remediation workflows to enable users to self-remediate without requiring assistance from the IT helpdesk.	✓

Note:

- Availability of certain features and functionality depends on the deployment type – on-premises vs SaaS.
- Availability might vary based on operating system and device type.
- ServiceConnect integrations available with the Platinum bundle includes MobileIron developed software to integrate with specific third-party products and services. API-based integrations do not require the purchase of the Platinum bundle.
